In the Specification:

Please change the title of the application to "WEB PAGE FILTERING INCLUDING SUBSTITUTION OF USER-ENTERED EMAIL ADDRESS".

At page 36, please amend the paragraph starting at line 3 as follows:

FIG. 12 is a diagram that illustrates a filtered web page after a universal e-mail address is used in conjunction with a web site. FIG. 12 shows a filtered web page 1200 that includes a header object 1210 and content 1220. Content [[1120]] 1220 is the web page specified by the URL as provided by the server associated with that URL. Superimposed at the top of content 1220 is header object 1210 that is provided by the e-mail service, such as by using a browser companion tool or a proxy server. Header object [[1110]] 1210 includes several other objects, such as a message object [[1130]] 1230. Message object [[1130]] 1230 shows a message that a new e-mail address has been submitted to the server associated with filtered web page 1200, and message object [[1130]] 1230 may also show the unique address created by the e-mail service.

At page 37, line 23, delete the phrase "may e-mail service".
